

## O&H Environmental Statement

**O&H are automotive vehicle bodybuilders and converters including the associated mechanical and electrical design, engineering and manufacturing of vehicle for sale and for hire.**

O&H is committed to providing a quality of service which ensures a safe and healthy workplace and minimises our environmental impact. We operate in compliance with relevant environmental legislation and strive to use pollution prevention and environmental best practices in line with our commitment towards BS8555:2003 and ISO 14001:2004 Environmental Management Systems.

O&H work to integrate the environmental aspects and impacts into our decision making activities and are inspected by the VCA (Vehicle Certification Agency) for conformance to the requirements of the IEMA (Institute of Environmental Management and Assessment) Acorn Programme.

We promote environmental awareness amongst all who work for and on behalf of our company and encourage them to work in an environmentally responsible manner. We train, educate and inform all who work with us about environmental issues that may affect their work.

O&H promote efficient use of materials and resources throughout our facility including water, electricity and raw materials, particularly those that are non-renewable. We monitor our energy usage and drive towards our zero landfill targets and KPI objectives. We avoid unnecessary use of hazardous materials and products, taking reasonable steps to protect our people and the environment in which they interact when used, stored and disposed of. When required by legislation or where significant health, safety or environmental hazards exist, we implement appropriate arrangements to protect our workforce and the environment so far as is reasonably practicable.

We communicate our environmental commitment to our people, customers and suppliers. We purchase environmentally responsible products and commit to purchasing recyclable products and environmentally friendly materials as appropriate, economical and suitable to our business needs. By working closely with our chosen waste providers we will continue to reduce our impact on the environment through re-use and recycling and achieving Zero to Landfill status.

O&H strive to continually improve our environmental objectives and KPI performance aspects and impacts of activities by periodically reviewing our environmental policy in light of our current and planned future activities, and with reference to the Environmental Protection Act (1990).

If you have any questions or require further information on any of our QHSE policies then please contact our QHSE Manager, Shane Nicholson, on telephone number 01405 769867 or email [snicholson@ohvc.co.uk](mailto:snicholson@ohvc.co.uk)
