

Oughtred & Harrison (Facilities) Ltd - Environmental Policy Statement

Oughtred & Harrison (Facilities) Ltd (referred to as O&H for the purpose of this document) are Automotive Vehicle Bodybuilders and Convertors including the associated mechanical and electrical design, engineering and manufacturing of vehicles for sale and for hire.

We are committed to providing a quality of service which ensures a safe and healthy workplace and minimises our potential environmental impact. We operate in compliance with all relevant environmental legislation and we strive to use pollution prevention and environmental best practices in all that we do in line with our commitment to our certification to BS8555:2003 Environmental Management Systems.

We promote environmental awareness among all who work for or on behalf of our company and encourage them to work in an environmentally responsible manner. We train, educate and inform all who work with us about environmental issues that may affect their work.

O&H promote efficient use of materials and resources and work to integrate the consideration of environmental aspects and impacts into our decision making and activities with a focus on water, electricity and raw materials, particularly those that are non-renewable. We avoid unnecessary use of hazardous materials and products and seek substitutions when feasible. We take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of. Where required by legislation or where significant health, safety or environmental hazards exist, we develop and maintain appropriate arrangements to protect our workforce and the environment so far as is reasonably practicable.

We communicate our environmental commitment to clients and customers and encourage them to support it. By working closely with our suppliers we ensure we purchase and use environmentally responsible products. We are committed to purchasing recycled, recyclable or re-furnished products and materials where appropriate, economical and suitable to our business requirements.

Through working closely with our chosen waste providers we will continue to reduce our impact on the environment through re-use and recycling.

O&H strive to continually improve our environmental performance and minimise the social impact and damage of activities by periodically reviewing our environmental policy in light of our current and planned future activities, and with reference to the Environmental Protection Act (1990.)

Peter Van Smirren  (Managing Director)
